

● female ■ male

## Sensitivity

## Both sexes [95% CI]

any abnormality	74.3% [64.6% – 82.4%]
endothelial dysfunction	75.3% [64.5% – 84.2%]
microvascular dysfunction	80.0% [59.3% – 93.2%]
myocardial bridge	73.2% [61.4% – 83.1%]

## Specificity

any abnormality	53.6% [33.9% – 72.5%]
endothelial dysfunction	44.7% [30.2% – 59.9%]
microvascular dysfunction	34.6% [25.6% – 44.6%]
myocardial bridge	37.9% [25.5% – 51.6%]

## PPV

any abnormality	85.2% [76.1% – 91.9%]
endothelial dysfunction	70.1% [59.4% – 79.5%]
microvascular dysfunction	22.7% [14.5% – 32.9%]
myocardial bridge	59.1% [48.1% – 69.5%]

## NPV

any abnormality	36.6% [22.1% – 53.1%]
endothelial dysfunction	51.2% [35.1% – 67.1%]
microvascular dysfunction	87.8% [73.8% – 95.9%]
myocardial bridge	53.7% [37.4% – 69.3%]
